

With award-winning security, network and storage solutions, Barracuda Networks works to continuously monitor and block the latest Internet threats.

PROFESSIONAL CONSULTING SERVICES

Newberry's in-house, Barracuda-certified engineers can assist customers through consulting engagements to plan and optimize the Barracuda Networks solutions for your business environment. Utilizing the comprehensive security, networking, and data protection products, Newberry can implement Barracuda solutions that protect all aspects of your organizations network environment. Customers are assured of a customized and fully operational deployment at the end of each engagement, ensuring a rapid return on investment and leaving your organizational staff empowered to manage the solutions on an ongoing basis.

PRODUCT TRAINING

As an Authorized Training Center with Barracuda, we offer BTN300 - Barracuda NG Firewall Certified Security Engineer Training. This 5-day course includes installing, configuring and operating a Barracuda NG Firewall system.

For a list of upcoming classes, visit www.newberrygroup.com/Training.aspx

PURCHASE OF BARRACUDA PRODUCTS

Newberry is an authorized reseller of all Barracuda products to include:

- **Barracuda NG Firewall:** The Barracuda NG Firewall is a family of hardware and virtual appliances designed to protect your network infrastructure, improve your site-to-site connectivity and simplify administration of your network operations.
- **Barracuda Web Application Firewall:** The Barracuda Web Application Firewall provides superior protection against hackers' attempts to exploit vulnerabilities in Web sites or Web applications to steal data, cause denial of service or deface Web sites.
- **Barracuda Backup:** The Barracuda Backup combines a plug-and-play appliance for onsite backups with cloud and private cloud disc-based replication to quickly and securely store data in multiple locations off-site.
- **Barracuda SSL VPN:** The Barracuda SSL VPN provides a secure connection for your remote users to allow them access to internal network resources while providing administrators the tools to allow for granular management capability using existing authentication policies.
