GROUP

**Barracuda**

# All Health Checks Include:

1. **Scoping Phone Call** to determine the size and scope of your environment.

2. **Remote Technical Review** providing a high level overview of the existing Barracuda WAF installation to include a review of the WAF's services, deployment method, security policies, website profiles, system updates and disaster recovery methodology.

3. **Health Check Report** containing:

- **Business Environment Review** detailing primary customer and partner contact personnel, along with current WAF solution(s) in use.
- **Technical Review findings** of the customer's WAF deployment including recommendations to enhance security posture, redundancy, data assurance and industry best practices compliance.
- **Explanation of errors**, warnings and log activity for the WAF environment.
- **Executive Summary** with findings from the review, documented issues, observations and suggested next steps that can be presented to your senior management.

4. **Verbal Consultation** to discuss the findings of the report.
