

HEALTH CHECK

Is your Forcepoint® deployment optimized for maximum efficiency?

Changes to your network and user environment often prompt changes to your Forcepoint® deployment. Our Forcepoint®-certified engineers evaluate your current installation and provide analysis, results, and recommendations for improvement.

Health Check Packages:

All options include a scoping call, technical review, report and consultation. See back for details.

- ☐ **OPTION 1: \$990.00***
Health Check for 1 Forcepoint® TRITON APX component: AP-Web, AP-Email, or AP-Data
- ☐ **OPTION 2: \$1650.00***
Health Check for 2 Forcepoint® TRITON APX components: AP-Web, AP-Email, or AP-Data
- ☐ **OPTION 3: \$2350.00***
Health Check for 3 Forcepoint® TRITON APX components: AP-Web, AP-Email, or AP-Data

*Pricing is per v5000 or v10000 device.

All Health Checks Include:

1. **Scoping Phone Call** to determine the size and scope of your situation.

2. **Health Check Technical Review** of your existing Forcepoint® Control categories, including:

- Network Agent
- Forcepoint® TRITON Server and Log Database
- User Identification and Directory Server
- Forcepoint® Content Gateway (if applicable)

3. **Health Check Report** containing:

- **Business Environment Review** detailing primary customer and partner contact personnel, along with any current Web, Email and Data Security solutions in use.
- **Technical Review findings**, including recommendations to improve efficiency, minimize or remove known issues, reduce complexity, and maximize return on investment.
- **Explanation of alerts** in the TRITON management console.
- **Executive Summary** with findings from the review, documented issues, observations and suggested next steps that can be presented to your senior management.

4. **Verbal Consultation** to discuss the findings of the report.
